

Our 2021 collections look largely the same as 2020's, with minimal changes to the assortments because we know that 2020 business has been tough. with many products that didn't sell through and high levels of inventory carryover. So in many ways, 2021 is a 2020 do-over. However, we're introducing four new products for 2021 that are focused on today's new "outside"

at LOWA and we hope that you, our retail partners, will join us.

You'll also find new color options in many of our important light hikers and sport shoes, plus some new Everyday models like the Valletta to make your boot & shoe wall fresh and enticing.

We look forward to taking **#FORTHENEXTSTEP** with you as we mutually work together to rebuild and ultimately grow our business.

Thanks for your business in the most trying of times and here's to 2021!

EXPEDITION 6000 EVO RD 🥯 🔻

MSRP: \$900

Our most protective and insulated mountaineering boot was developed in collaboration with LOWA Pro Team member Ralf Dujmovits for extreme high altitude expeditions. It's loaded with technical features to keep your feet protected, warm, dry and comfortable on even the most punishing climbs, and has been worn on every 8000 meter peak in the world. The insulated double boot with reflective-coated technologies retains valuable body heat while the high outside TIZIP closure on the ceramic-coated fabric gaiter provides essential waterproof protection and durability. Automatic crampon compatible.

Upper: Abrasion-Resistant Synthetic

Fabric w/ Full-length TIZIP

Lining: GORE-TEX DURATHERM®,

PrimaLoft® 400g

Insole: Insulate Pro Alu-Coated w/ Fleece

ALPINE ICE GTX 🌩 🥯

MSRP: \$650

This high performance alpine boot with an integrated gaiter is designed with a close-to-ground outsole, an anatomical fit feature that uses memory foam to contour to the foot's shape to help prevent fatigue, and a slingshot heel for secure foothold, comfort and rock feel. Very stiff underfoot, insulated yet extremely light in weight for a low altitude mountaineering boot, and automatic crampon-compatible, this is truly a "Formula One" boot for mixed climbing and low altitude expeditions. Durably waterproof/breathable.

Abrasion-Resistant Synthetic Fabric w/ Full-length TIZIP Upper:

Lining: GORE-TEX DURATHERM®

Insole: Insulate Pro Alu-Coated w/ Fleece

Low Profile DuraPU® Midsole: Outsole: VIBRAM® Alp Trac® Ice Mountaineering Hard Winter Stabilizer: Weight: 875 g/Single Shoe

5.5 - 10.5

A breakthrough in alpine boot design, this next-gen concept was developed in conjunction with alpinist David Göttler who sought a super-lightweight high altitude training/acclimatization boot. The flexible LOWA REPTEX abrasion-resistant upper is injected with PU "scales" that mimic a reptile's protective skin, thus replacing a traditional heavy rubber rand, while the VIBRAM® Alp Trac® SL sole features Litebase technology that substantially reduces the weight and thickness of the sole without affecting its traction or wear resistance. Combination crampon compatible. 100% vegan. Durably waterproof/breathable.

Synthetic/Microfiber Upper:

Lining: GORE-TEX

Insole: Climate Control

Midsole: EVA

VIBRAM® Alp Trac® SL Outsole: Mountaineering Hard Stabilizer: Weight: 550 g/Single Shoe

E RESOLEABLE

INNOX PRO GTX LO WS

This athletically inspired lace-up style is extremely lightweight yet delivers the superb support and extra-long life that comes from our proprietary DynaPU® midsole technology. Its design won praises from BACKPACKER's gear tester (April 2020), who cited its "....impressive rebound..." adding, "I didn't have that achey-tired feeling at the end of the day." 100% vegan. Durably waterproof/breathable. Made on a women's-specific last.

LOWA TECHNICAL FEATURES - UNDERFOOT

ANATOMICAL FIT

The anatomical shape of this carbon fiber insert wrapped in PU foam provides natural arch support and better fit.

CLIMBING ZONE

This flat support zone under the toes makes easy scrambling possible thanks to a more secure foot placement.

CLOSE-TO-THE-GROUND

A lower-profile platform for better sole contact with ground.

CLOSE-TO-THE-ROCK

Flatter toe profile is designed to keep the distance between foot and ground as small as possible, or precise toe-hold.

DOUBLE INJECTION

Comfort and cushioning is further improved for specific uses with a complex injection-molding process using a layering process.

HARD STABILIZER

Nylon joint-stabilizing element offers perfect support for more intense outdoor activities.

HARD WINTER STABILIZER

This insole provides stability for ideal support on challenging terrain and is insulated to deliver warmth underfoot

HARD WINTER STABILIZER

LOWA DURAPU®

This denser PU material is used in our Classic & ATC models. It absorbs shock and rebounds well, and is extremely durable.

LOWA DYNAPU®

LOWA's proprietary PU midsole material is extremely lightweight yet provides ideal support, durability and rebound.

LOWA's proprietary PU midsole, now available for cemented,

board-lasted sole construction. It's extremely lightweight,

yet provides ideal support, durability and rebound.

MODERATELY STIFF

Footwear labeled "moderately stiff" provides a good combination of optimal support for the foot's musculature and pleasant rolling properties.

MONOWRAP®

MONOWRAP®

RESOLEABLE

SHOCK ABSORBER

MONOWRAP

Our exclusive PU frame technology delivers outstanding stability and support. We use three different PU frame designs to provide lateral support. The higher the frame, the more support.

DYNA PU®+

LOWA PU OUTSOLE

LOWA DYNAPU®+

Conceived and developed by LOWA, this PU outsole has a tread design with varying lugs based on intended use. This outsole is used in particular for children's outsoles because it offers a good blend of lightness and abrasion resistance.

LOWA RUBBER OUTSOLE

Conceived and developed by LOWA, this rubber outsole varies in its rubber blend has a tread design with varying lugs, both factors based on intended use. Ideal for off-trail use.

LOWA TPU OUTSOLE

MEDIUM STABILIZER

support for outdoor activities.

Conceived and developed by LOWA, this TPU outsole has a tread design with varying lugs based on intended use. TPU's advantages include excellent abrasion resistance, better flex, and the ability to use thinner and lighter outsoles. Ideal for casual, urban use.

SINGLE INJECTION

This manufacturing method of injection molding offers

Integrated heel cushioning set into the insole, for more

LOWA can resole this product for an additional fee.

SHOCK ABSORBER

comfort and rebound.

RESOLEABLE

the highest precision with a direct and solid connection between the sole and the upper.

SOFT STABILIZER

Nylon joint-stabilizing element offers optimal support for recreational activity.

Nylon joint-stabilizing element offers optimal

MEDIUM STABILIZER

LOWA TECHNICAL FEATURES – UPPER TECHNOLOGIES

2-ZONE LACING

Independently adjustable lacing zones, one on the forefoot and one on the upper, allow user to customize the lacing tension and do special foot-hold lacing techniques.

ADJUSTABLE TONGUE

Perfect tongue placement, for a precise fit.

C4-TONGUE

The anatomically shaped, padded tongue is designed to improve ankle flex and decrease pressure points, for all-day comfort.

DOUBLE INJECTION

Comfort and cushioning is further improved for specific uses with a complex injection-molding process using a layering process.

FIT FRAME

The shell-like construction of the sole envelops and secures the foot to provide optimal fit.

FIT RIBBON

Minimalist lacing system combines highest performance with maximum weight reduction area.

FIT WING

Creates ideal tensioning for more control and better fit in the heel area.

FLEXFIT®

Easier ankle movement due to integrated "FlexZone" and flexible lace.

FLEXFIT SYNCRO®

Asymmetrical upper construction for synchronized movement of the boot's shaft with the lower leg.

I-LOCK

A cam lace-loop placed at the top of the foot that grabs the lace and holds it tight, for secure and flexible shaft lacing.

LIGHTER WEIGHT

All dimensions, materials have been optimized to reduce weight while working to maintain highest performance.

LOWA FLEX®

Upper construction with freely moving, individually mounted lace hooks provides a more individualized fit and allows the lacing system to flex as you walk, for better comfort.

LOWA REPTEX

Abrasion-resistant PU "scales" mimic a reptile's protective skin and helps protect the boot's upper, in turn reducing weight on models where light weight is paramount.

MINIMAL SEAMS

Construction design minimizes the number of seams to prevent possible friction or pressure points

ROLLER EYELETS

Metal eyelets with small rollers minimize friction, equalize tension.

SLINGSHOT

Provides a very snug fit around the heel.

WATERPROOF ZIPPER

Protects against moisture and cold in extreme conditions.

X-LACING®

Patented LOWA technology holds the tongue in place, both vertically and horizontally, preventing slippage and pressure points and blisters.

PLEASE NOTE: Stabilizer firmness designations (Hard-Medium-Soft) are relative to the other models within the category in which that product appears.
